

LEANDRO AGUILAR

Backend Developer

Caracas, Venezuela — +58 426-204-5964 — leaguilar099@gmail.com

PROFESSIONAL SUMMARY

Backend Developer with 3 years of production experience designing and deploying RESTful APIs in Java and Spring Boot within containerized, self-managed Kubernetes environments. Skilled in relational database design, CI/CD automation, and secure API development using Spring Security and JWT. Also proficient in Python for process automation and scripting, supporting integration and monitoring tasks alongside core backend development. Comfortable operating across the full development lifecycle — from clean-architecture design to on-premise infrastructure deployment — with strong cross-functional collaboration and C1-level English fluency for international teams.

WORK EXPERIENCE

Backend Developer

September 2023 – Present

KMG CA.

Caracas, Venezuela

- Designed and developed RESTful APIs in Java and Spring Boot, applying clean architecture principles to build maintainable, production-grade backend services.
- Implemented authentication and authorization for REST endpoints using Spring Security and JWT, strengthening application-level security.
- Wrote unit and integration tests with JUnit, improving code reliability and catching regressions before deployment.
- Built and maintained CI/CD pipelines to automate build, test, and deployment cycles across the development lifecycle.
- Containerized backend services with Docker and deployed them across self-managed, on-premise Kubernetes clusters on Linux, without reliance on managed cloud services.
- Configured MetalLB as a load balancer and Nginx Ingress Controller to route traffic to internal microservices within a private on-premise network.
- Provisioned and managed persistent storage (PV/PVC) backed by NFS to ensure data durability for stateful services and pods.
- Maintained cluster lifecycle operations via kubectl, including certificate renewal, version upgrades, and master node health monitoring through direct SSH access.
- Monitored application, container, and infrastructure-level performance, partnering with cross-functional teams to troubleshoot and resolve production incidents.
- Participated in peer code reviews, reinforcing code quality and maintainability standards across the team.

Web Development & Process Automation Intern

Feb 2023 – Jun 2023

CANTV – *Compañía Anónima Nacional Teléfonos de Venezuela*

Caracas, Venezuela

- Developed and maintained institutional WordPress websites, improving stability, usability, and performance.
- Designed and built a Python-based automation tool to detect and monitor faults and incidents across telecommunications services in real time, eliminating manual monitoring effort and directly supporting operational continuity for the business.
- Streamlined operational workflows through automation scripts, reducing manual processing time and increasing team efficiency.
- Delivered technical support and monitoring for internal platforms, maintaining service continuity and reducing resolution time for reported issues.
- Authored technical documentation for deployed solutions, enabling faster onboarding and knowledge transfer across the team.

EDUCATION

Associate Degree in Computer Science

2022 – 2023

(2-year Higher Vocational Education — ISCED Level 5 / EQF Level 5)

ISUM Instituto Universitario, Venezuela

High School Diploma, Science Track

2016 – 2021

CERTIFICATIONS & CONTINUOUS LEARNING

- Object-Oriented Python, Algorithm Complexity & Error Handling – Platzi, 2026
- Prompt Engineering – Platzi, 2026
- Python Programming – Universitat Politècnica de València, 2024
- HTML & CSS – Google / Platzi, 2023
- CS50's Web Programming with Python and JavaScript – Harvard University (*in progress*)

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, HTML, CSS
- **Backend & Frameworks:** Spring Boot, Spring Web, Spring Security, JPA/Hibernate, RESTful API design
- **Infrastructure & DevOps:** Docker, Kubernetes (self-managed/on-premise: MetalLB, Nginx Ingress, PV/PVC, kubectl), Linux, CI/CD pipelines
- **Testing & Quality:** JUnit, unit & integration testing, code review
- **Databases:** Relational databases, data modeling, SQL query optimization
- **Tools:** Git/GitHub, Maven, Postman, IntelliJ IDEA, VS Code

LANGUAGES

- Spanish – Native
- English – C1 (EF SET Certificate, 2023)
